EXPERIENCE

Senior Cybersecurity Analyst

Nationwide Mutual Insurance

📅 01/2020   📍 Columbus, Ohio

- Responsible for investigating cyber incidents using industry recognised standards and methodology like PICERL
- Conducting comprehensive alert and pre-detection research to improve the rate of detection fidelity, mitigate potential threats, and ensure continuous protection and prevention of security breaches
- Performing daily security monitoring and threat analysis using security tools such as Splunk, CrowdStrike, Zscaler and XSIAM/XSOAR
- Identifying network traffic and system records for any suspicious or unusual activities and providing suggestions for resolving it
- Tracking and identifying security hazards to the business, as well as the appropriate technology or practices that need to change to minimize such risks
- Using ServiceNow's ticketing system to report security problems when events indicate a problem
- Development and deployment of automation and orchestration playbooks for enrichment and management of cybersecurity incidents/events
- Identification of vulnerabilities associated with services and assets and actively collaborating with vulnerability management functions to patch them
- Development of automation scripts and dashboards
- Identify and analyzing log sources and system events to develop and refine cybersecurity detection mechanisms, ensuring accurate and effective threat identification and response

Junior Cybersecurity Analyst

State of Ohio DAS

📅 01/2018 01/2020   📍 Columbus, Ohio

- Responsible for the management and configuration of SIEM Qradar) and web Proxy Bluecoat) tools
- Participated in the development of technical and IT risk profile assessment plans for State applications using the ServiceNow application platform
- Documented backup architecture of IDS/IPS applications
- Identified, Investigated, and mitigated malware attacks associated with endpoints, cloud assets and web-based applications
- Developed workflow documents for reference during investigations and conducted weekly application and systems scans for remediation, documentation, and identification purposes
- Leveraged advanced Office 365 platform protection for email, endpoint, and identity based incident investigation

EDUCATION

Bachelor's degree in cybersecurity

Franklin University

📅 01/2019 12/2019   📍 Columbus Ohio

SUMMARY

Skilled Cybersecurity Analyst with CompTIA Security+, CEH and SANS GCIH certification with expertise in incident response investigation, risk management, threat mitigation, automation and vulnerability management. Strong knowledge of incident response investigation using industry recognised standards and methodology

CERTIFICATION

Certified Ethical Hacker (CEH)   **Comptia Security+**

CYSA   **GCIH**
